

April 30, 1952

To Whom It May Concern:

This file is of great importance, because, upon close examination, it shows how the delegations of the states and territories were made up within the student body. To fill out the delegations fictitious names were used and a rule was incorporated into the convention Rules which can, along with the fictitious names, be found in the file submitted by the secretary Tom Shepard. Money for the administrative business and decorations for convention came from a small fund of the Student Body ~~at~~ Executive Committee fund. Money used by the state delegations came from the students who made up the con delegations. Also some (a very small sum) came from candidates and states.
