ON THE COVER: A portrait of Charles Howard Parmly, whose daughter, Miss Ruth Parmly of New York City, has made a gift of \$1.5 million to the University's endowment. In recognition of the gift, the University has named its physics, engineering, and biology building Parmly Hall and will formally dedicate the building to the memory of Prof. Parmly in a ceremony this year. Stories dealing with the gift begin on Page 1.

Miss Ruth Parmly gives \$1.5 million; Science building named for her father

A \$1.5-million gift to the endowment of Washington and Lee has been made by Miss Ruth Parmly of New York City in honor of her father, the late Charles Howard Parmly.

In recognition of the gift, the University has named its physics, engineering, and biology building Parmly Hall. The facility had been known until now simply as the "New Science Building."

The announcement was made Jan. 20 by President Robert E. R. Huntley at a convocation marking Founders' Day, Robert E. Lee's birthday, and Omicron Delta Kappa "tap" day.

Prof. Parmly taught physics and engineering at the College of the City of New York from 1888, the year of his graduation from that institution, until his death in 1917 at the age of 48.

He was the founder of CCNY's engineering school, having spent several years planning it in detail. The CCNY board of trustees approved his proposal and named him its first professor and chairman only four months before his death.

The income from Miss Parmly's gift will be used to support Washington and Lee's academic programs in the field of science and to continue strengthening faculty salaries in those departments.

Miss Parmly's \$1.5-million gift to Washington and Lee is one of the largest in its 226-year history, and brings to \$27.2 million the amount raised to date in its development program for the decade of the 1970s. That total represents 75 per cent of the \$36-million initial goal for 1976.

Washington and Lee's physics-engineering-biology building will be formally dedicated to Prof. Parmly's memory in a ceremony in 1975.

Though he spent his entire professional career at City College, Prof. Parmly was, in President Huntley's phrase, "manifestly the kind of man who today gives Washington and Lee its enduring strength—an extraordinarily effective teacher of undergraduates.

"There can be no more fitting tribute to Charles Howard Parmly and to the standard of education his life reflected—and which we seek also to reflect—than the dedication of our physics, engineering, and biology building to his memory."

The building contains classrooms, specialized li-

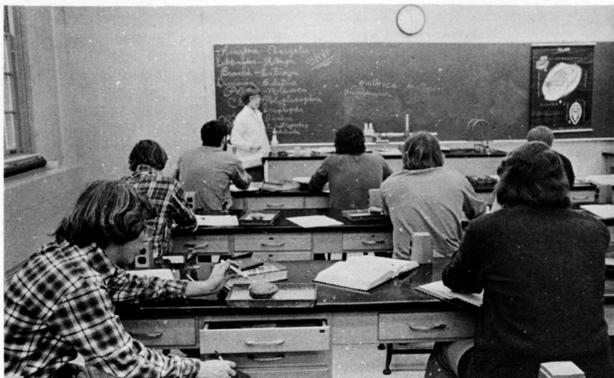

A RESOLUTION

Once in a very great while, Washington and Lee University is touched by an act of generosity and devotion so extraordinary that its impact uplifts the institution both physically and spiritually. Miss Ruth Parmly's gift of \$1.5 million, which we acknowledge with profound gratitude by this resolution, is clearly such an event in our history.

It is especially fitting, we believe, that Miss Parmly should in this way honor the memory of her father, Charles Howard Parmly, who distinguished himself as a scholar and teacher at The College of The City of New York and as founder and first chairman of that institution's School of Engineering. The primary strength of Washington and Lee over its long history has been the frequent presence on its faculty of men who combined outstanding scholarly achievement with devotion and skill as teachers. Clearly Professor Parmly was such a man. Thus it does this University honor to associate the name of Parmly with our own tradition of excellence as a teaching institution and with our century-long commitment to strength in the sciences.

Thus be it resolved that The Board of Trustees of Washington and Lee University, with grateful hearts and deep respect, names the University's physics, engineering, and biology building *Charles Howard Parmly Hall* and dedicates this structure to his memory.

The Board of Trustees
Washington and Lee University
February 1, 1975

braries, offices and extensive research laboratory facilities. Aided by a number of important gifts and grants, including a \$250,000 grant from the Alfred P. Sloan Foundation in 1968 to strengthen science instruction and facilities, Washington and Lee provides education in the sciences unusual in scope and quality, as well as in the sophistication of its equipment for undergraduate instruction.

Among the University's science majors are programs leading to the bachelor's degree in physics alone and in engineering in combination with either physics or chemistry. Special combined programs leading to the bachelor's and master's degrees in engineering are available in cooperation with Columbia University—where Prof. Parmly received his graduate education—and with Rensselaer Polytechnic Institute and the Massachusetts Institute of Technology.

In addition to the announcement of Miss Parmly's gift at the Founders' Day ceremonies, a special announcement of the gift was made to the Achievement Council, the volunteer leadership organization which has responsibility for realizing the University's development goals, by President Huntley and John M. Stemmons of Dallas, chairman of the Council. Stemmons is president of Industrial Properties Corp. and has been a Washington and Lee Trustee since 1965.

"Miss Parmly's gift springs from a great and generous heart," Stemmons said. "It will make an important difference in Washington and Lee's future financial

strength, and it comes as a most encouraging endorsement of the University's continuing development, its character and its quality."

It was through a member of the Council—Joseph C. Broadus, senior vice president of The Petroleum Corp. of Delaware and representative of the Achievement Council in New York City—that Washington and Lee came to Miss Parmly's attention again. Though there had been no direct connection between the Parmly family and Washington and Lee, Miss Parmly learned as a child of a bequest to the University by Mr. and Mrs. Robert Parker Doremus. Mrs. Doremus' sister, Mrs. William Green, was a friend of Miss Parmly's mother.

The Doremuses likewise had never been connected with Washington and Lee, when in 1913 on a visit to Virginia they stopped at the University and were greeted by an unidentified student who offered to escort them about the campus. They were so impressed by the student's gentlemanliness and friendly manner that, upon their return to New York, they arranged that on their deaths their estate should come to Washington and Lee.

After Mr. Doremus' death later in 1913, his widow gave funds to Washington and Lee for construction of a gymnasium as a memorial to her husband. (Doremus Gymnasium, greatly expanded and renovated in 1972, remains the center of the University's athletic facilities.) When Mrs. Doremus died in 1936, the estate amounted to \$1.5 million.

Parmly Hall: The finest science facilities

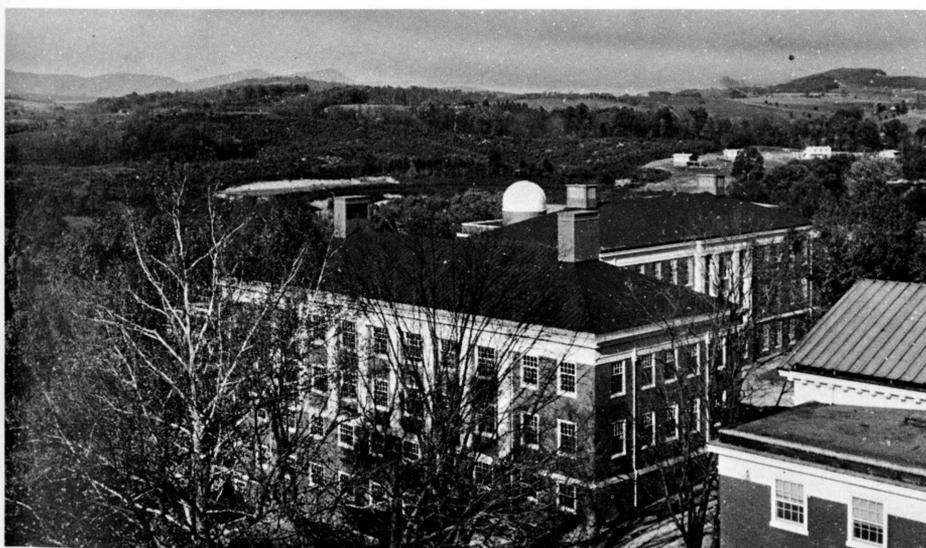

Parmly Hall—the new name of Washington and Lee's "new science building"—is a showcase for undergraduate teaching and research facilities in physics, physics-engineering and biology.

The four-story structure is, of course, in perfect harmony with Washington and Lee's traditional modified-Greek Revival architectural style. On the inside, though, Parmly Hall provides facilities that are anything but simple and classical.

The largest single academic building on campus, Parmly Hall contains two complete science libraries

(one in physics, one in biology), three lecture rooms, several class laboratory rooms fully equipped with apparatus for each student, offices and private research labs for each of the 11 teachers in the building, and several small labs for student use.

The physics department—whose observatory is located atop Howe Hall, the adjacent "old" science building—maintains an astronomy museum in Parmly Hall, a principal exhibit in which is General Lee's "orrery," the 31-gear planetarium purchased in 1868 and still used for instruction today (it indicates the relative posi-

Parmly Hall, the largest academic building on campus, is located next to Howe Hall (at right above). Reid Hall—old engineering-physics building, now home of Department of Journalism and Communications—is visible to south of Parmly Hall (left center in photo).

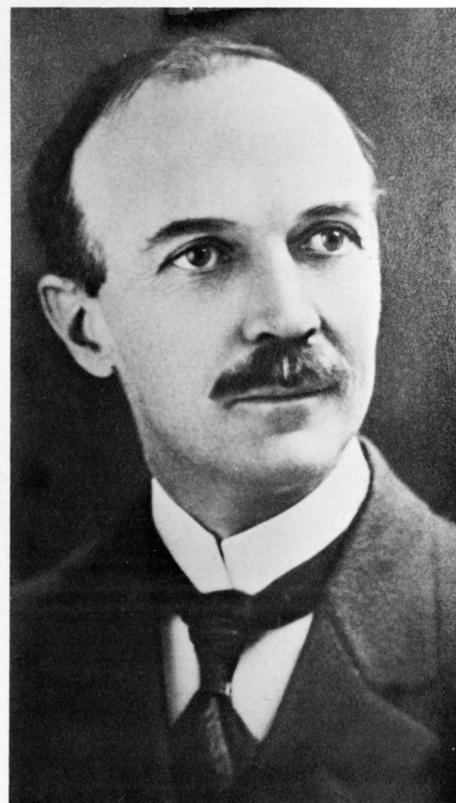

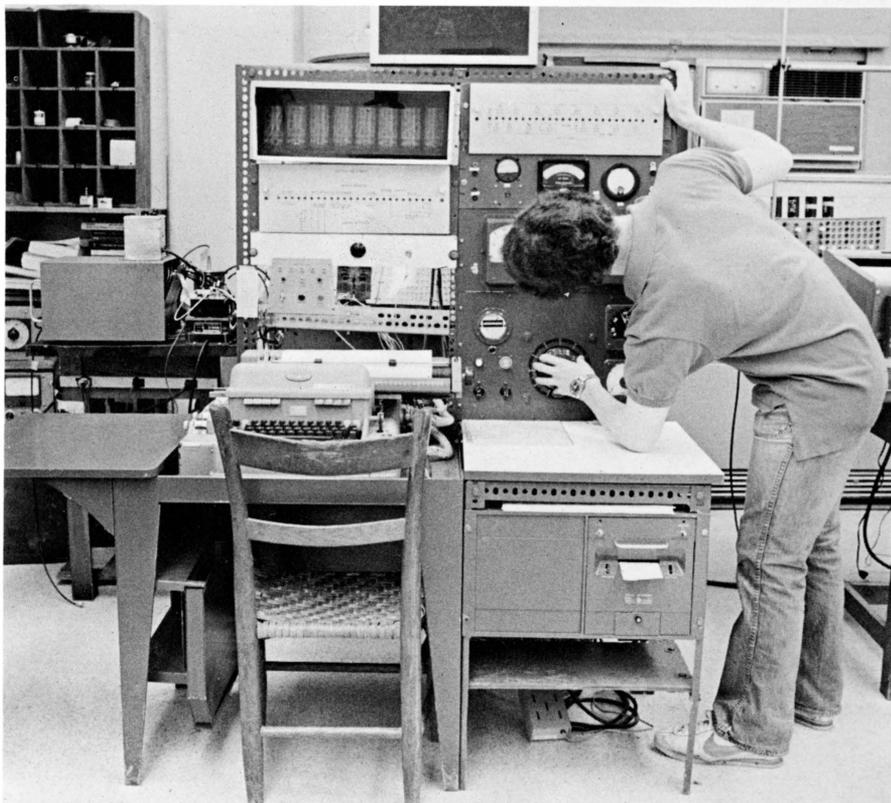

Photo at left shows Parmly Hall from cupola of Washington Hall looking northwest. At lower right is Tucker Hall; perpendicular to Parmly Hall is Howe Hall. Note physics department's observatory (white half-sphere) atop Howe.

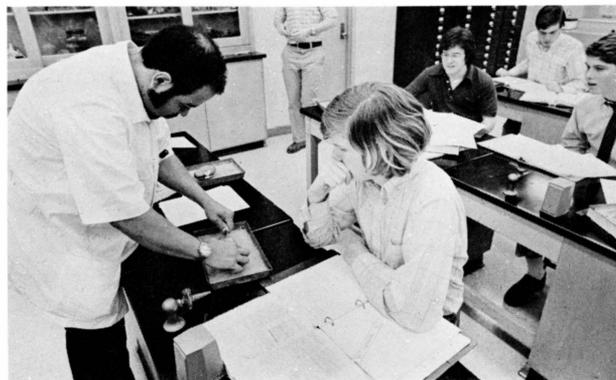

Parmly Gift

Right: Dr. William E. Bryant, assistant professor of biology, at work in Parmly Hall greenhouse, important laboratory facility for botanical instruction and research.

Below: student at control panel of "OWL," physics department's computer. Students and professors designed all solid-state circuitry for power supply, programming, input, display-panel and printout components.

Below right: Charles Howard Parmly, founder and first professor of school of engineering at City College of New York, whose daughter, Miss Ruth Parmly, made a \$1.5 million gift to endowment of Washington and Lee in his memory.

tions, speeds, movements and inclinations of the earth, moon and nearby planets in a visual way that new planetariums can't). The latest "museum" piece acquired for the Parmly Hall facility is a nosecone computer used in Minuteman missiles, one of six given to Washington and Lee by the federal government.

Teachers and students in engineering and physics have at their disposal separate fully equipped research labs for study of and research into such areas as electricity and electronics, physics and engineering mechanics, nuclear phenomena, optics, photography and, according to the nature of current research objectives, virtually any other specialized field. (An accompanying article describes some of the research taking place in Parmly Hall.)

Facilities in biology are no less sophisticated. There are complete laboratory facilities for histology (the study of tissue and cell characteristics), embryology, genetics

and microbiology, physiology and cell biology, ecology, and general biological studies. "Homes" for living specimens are located throughout the biology areas in Parmly Hall—display cases for reptiles; indoor and outdoor tanks for fish used in one professor's kidney research; a greenhouse in which is grown a world of plants, from cactus to orchids; even a "rat room."

For alumni who have not visited Washington and Lee since the new science building was constructed, Parmly Hall lies just west of Tucker Hall, perpendicular to Howe. The building was constructed with funds raised in the University's 1959-61 Development Program. At the time it was opened for classes, the observation was made that "for the first time in many years, the University is able to offer a program in the sciences whose physical facilities are on a par with the high caliber of professors and students engaged in the program."

'Integrity, character—matched by ability'

"He could have sent us on our way with much less than the pains he took . . ."

—A student of Charles Howard Parmly
in a 1926 reminiscence

Charles Howard Parmly was "manifestly the kind of man who today gives Washington and Lee its enduring strength—an extraordinarily effective teacher of undergraduates."

—President Huntley

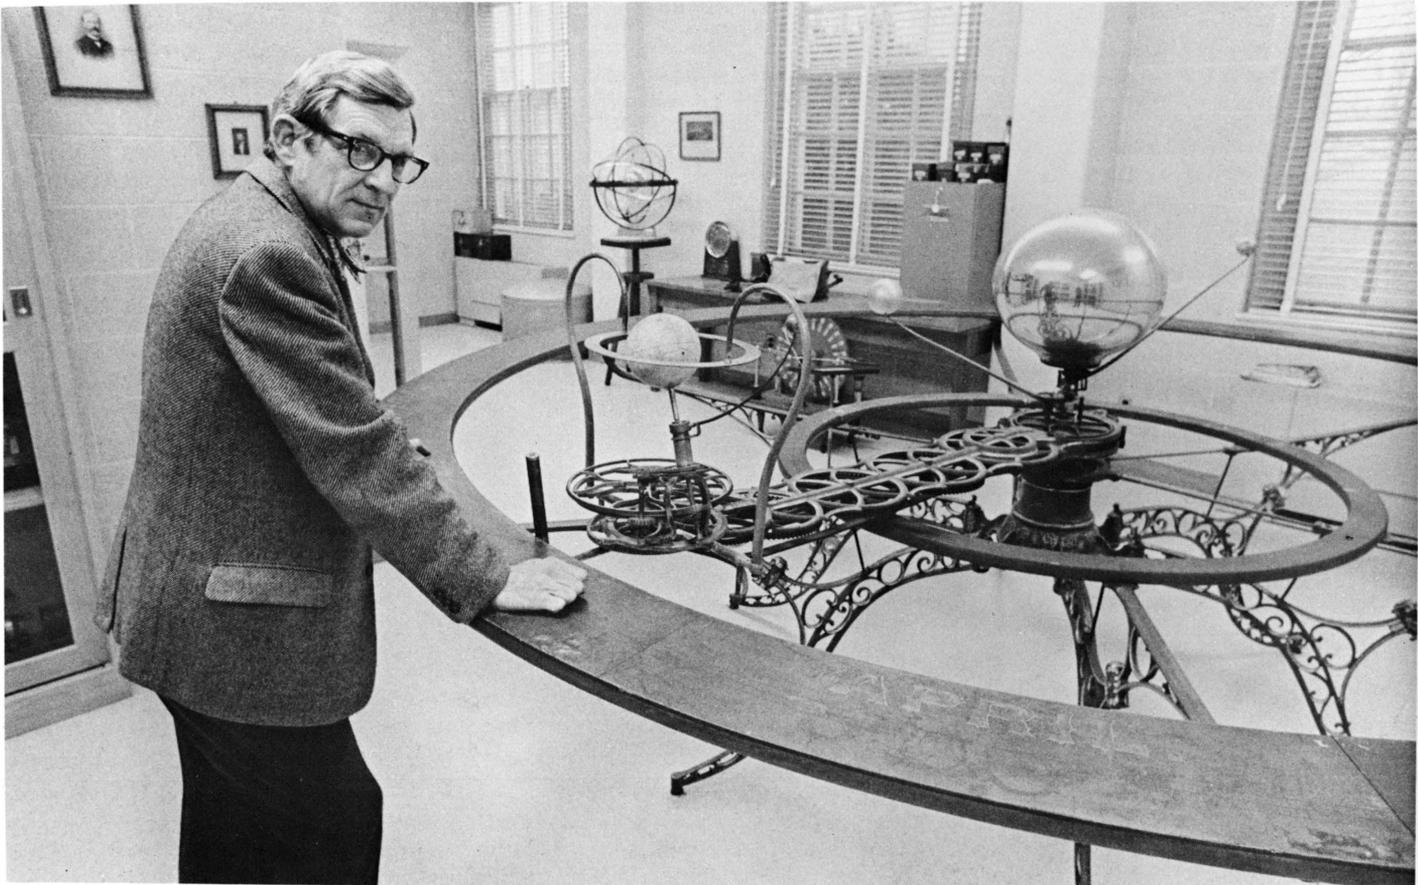

Perhaps the best measure of Charles Howard Parmly is in the depth of gratitude of students who studied under him and the admiration of colleagues who taught with him. He held his students to the most rigorous academic standards, never simply declaring a proposition to be fact but instead coaxing them to discover it for themselves by strict logical deduction, all the while intolerant (as an engineer above all must be) of the slightest imprecision of thought or inaccuracy of statement. And yet his former students and colleagues universally characterized him as one of the most genuinely

sympathetic, gentle, almost shy men they had ever known. His special knack was for imparting to his students what one of them described as "some of his regularity and logic." Charles Howard Parmly was, according to that young man, "the most orderly man I have ever known. . . . We stood in awe of him."

In a eulogy on his death, the president of City College of New York, Sidney E. Mezes, wrote: "Professor Parmly's outstanding quality was lucid and thorough thinking." Another CCNY tribute to him said: "Whenever the faculty or board of trustees needed a clear analysis of a complicated situation, Professor Parmly was apt to be the one called upon for the work." Still another noted: "His mind was an almost perfect piece of machinery, whose every part ran true. . . . He was a master of detail and a model of precision."

But that is only half the man. Because of those characteristics, CCNY President Mezes said, "Professor Parmly was a strong teacher. . . . The students who worked under him valued highly the training they received. They knew their subject well, and their minds

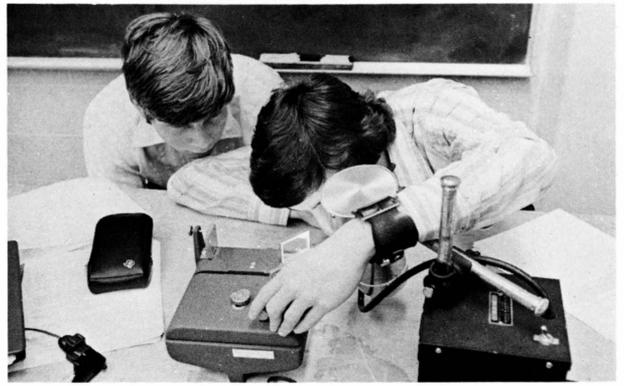

Parmly Gift

Above: Dr. Edward F. Turner, Jr., head of the physics department, at General Lee's "orrery" in physics department museum. The 107-year-old instrument follows earth, moon, and nearby planets through a year with precise duplications of orbits, relative position, speed and inclination of each. (Brass globe in the center is the "sun.")

Left: Physics library in Parmly Hall gives ready access to journals and reference materials, aiding students and teachers in their scholarly work. Biology department maintains a similar Parmly Hall library.

were keener for the experience." The other CCNY tributes to him echo that observation. "In an ultimate analysis, the central quality of Professor Parmly's character was integrity. In his intellectual life, as in his social and professional life, his most striking traits may be deduced from this fundamental principle . . . the mind so logically clear and complete, the vision so far-seeing, the spirit so gentle and yet so strong, the will so earnest in following its own aims, yet so tolerant of the aims of others."

And another: Prof. Parmly "was an artist in spirit, in his breadth of view, and in his comprehension of the larger meaning of the particular work in hand. . . . Details, methods, analyses interested him not because he had no higher interest, but because they might prepare the way for the accomplishment of the higher object. . . . Professor Parmly, then, was a man whose character matched his ability."

In a memoir by a CCNY classmate: "There was no man in our college class but knew and trusted and honored Charles Parmly." And from another classmate: "His central virtue was that of kindly service. He helped where the pressure of a subject was felt the greatest; and I may say there were many of us who needed his help, and many of us by that freely given help were able to face the ordeal of an hour in cosmic mathematics under Professor Compton with a stout heart, and to issue our chalky mandates for the next solar eclipse."

His teaching colleagues at CCNY knew of his consideration for his students well: "Many a perfect mark given to a usually muddle-headed student should really

have been credited to the clear-minded, generous-hearted comrade whose crisp logical explanation had made the difficulty plain."

Nine years after his death, a former student, then a radio engineer, recalled Prof. Parmly's teaching style: "He would make you clarify your thought by a method all his own. He never told a student anything simply in order to get through with the job and on to something else. But by asking questions in a strictly logical sequence he would lead him to the correct conclusion. This took time, and when the subject of such a Socratic inquisition happened to be stupid, Parmly would become impatient—but this never impelled him to abandon his method. [His questions] reverberated through the college halls, while the cowering student stammered his replies in barely audible tones. Finally the correct answer would be drawn out, and then the professor's stern face would break into a smile of startling sweetness, under the influence of which the incipient inferiority complex of the sophomore or junior was transformed into a determination to do better next time.

"When Parmly spoke," the former student continued, "he fairly etched his words. . . . He was inflexible only insofar as he had to be to turn out good engineers. He impressed us by his speech, his precepts and his methods with that apprehension of undeviating principles in the behavior of physical things. . . .

"If he teaches now in some other sphere, I hope he has better students, but they will not remember him with more deeply felt gratitude than the men he taught last on earth."

Dedicated teachers/research scientists

Perhaps nowhere more than in the natural sciences are the effects of the knowledge explosion more evident—and nothing proves it more dramatically than a visit to Parmly Hall.

The non-scientist first has to disabuse himself (and quickly) of the naive notion that engineering means drawing blueprints, that physics is the study of the rate of speed of a ball dropped from the Empire State Build-

ing, that you know biology if you know the difference between "flora" and "fauna."

For the Parmly Hall visitor finds himself talking with engineers who are concerned with stress characteristics of building materials when exposed to temperature extremes—with physicists who are developing new holographic techniques, using laser beams to create three-dimensional photographs—with biologists who are mak-

ing important discoveries about the ways kidneys perform their filtering functions. It doesn't really matter when you visit, because there's nearly always somebody there; teaching and research aren't 9-to-5 jobs. You'll find your scientist hosts to be intense about their work, yet eager to discuss it—and to make it comprehensible to a layman. Their occasional exhilaration is infectious when they have overcome some persistent, annoying obstacle at last or have just had some particularly difficult and exacting experiment succeed.

Visit with men like Ed Turner, head of the physics department. His own research interests range from library technology (he's been a consultant in that field to the Ford Foundation and the Office of Education, and is the author of a federally supported study of the implications of technology on small-college libraries). He earned two bachelor's degrees from Washington and Lee, a master's from M.I.T., and the Ph.D. from Virginia. He's a teacher first: though he is department head, he chooses to teach introductory physics as well as advanced courses in astronomy, electronics and electricity.

He presides over the "OWL," an acronym for "Oracle of Washington and Lee"—a computer that was discarded by the Defense Department three years ago (it used to repose in the nosecone of a Minuteman missile). Dr. Turner and his students spent enormous amounts of their "spare" time, including summers, adapting the nosecone computer for physics research. They developed and installed the overwhelmingly complex circuitry necessary to serve their purposes—even to the point of designing and making their own printed circuits.

The result? "OWL" is now being used to "control" an ongoing experiment to measure beta rays emitted by a lead isotope, Pb^{210} , and to plot the variable characteristics of transistors to enable assembly of extremely sophisticated circuits. What used to be an afternoon's work is now completed by the computer in one minute.

The University has received five more of the discarded Minuteman computers from the Defense Department, and one of them is on the verge of being put into service by Dr. Robert Brownell, assistant engineering professor. In adapting "his" nosecone computer, he has drawn heavily on Dr. Turner's experience, and the newer version will be even more sophisticated than the

"OWL." Dr. Brownell plans to conduct control-theory research with the new computer, programming it to issue orders, react to various phenomena and modify the experiment, record and even "interpret" data, and print the results.

Just across the hall, you're likely to find Dr. Harry T. Williams, Jr., assistant physics professor, working with holography—laser-beam photography which records a three-dimensional image on a two-dimensional glass plate. (Look at a hologram, and you can actually see behind things when you move around.) You'll see Dr. W. Barlow Newbolt, perhaps completing a research paper on ways to neutralize the electrical charge on the body of a spacecraft, or working on a Robert E. Lee Research Project with his student research associates on their electron spectroscopy investigations (measuring the electron spectrum to ascertain characteristics of radiation and atomic structure).

You'll find engineering students under Prof. Henry Ravenhorst and other teachers at work on such problems as the physical properties of materials used in machines and structures. You'll see them investigating static and dynamic mechanics—the physics-based study of equilibrium, structural forces, inertia, vibration, "kinetics" (force, mass, acceleration, work, energy). You'll see them applying principles of engineering graphics to actual problems: environment and design, site planning, and the like.

Listen at the door of a classroom, and you'll hear of vector calculus and the covariant formulation of electrodynamics and particle motion in external fields; the kinematics of nuclear reactions and black-body radiation; the Zeeman effect and the Millikan oil drop.

Stop upstairs in the biology area of Parmly Hall. Odds are you'll find Dr. Cleveland P. Hickman, Jr., in his office or in one of the labs he's using for his research into the permeability—the filtration capability—of the kidney. If he's in his office, he's likely to be working on a book or an article. He's the co-author, with his mother and father (both professors of biology at DePauw University) of the textbook *Integrated Principles of Zoology*, now in its fifth edition. With his father he's written *Biology of Animals*, which they're now revising for a second edition; he's just completed a new edition of his lab manual *Physiology* with a former colleague at the

Above left: Dr. Harry T. Williams, assistant physics professor, with glass holographic plate. Laser beam (from white instrument in front of Dr. Williams) will make visible a three-dimensional image on plate.

Above right: Dr. Gary H. Dobbs III, assistant biology professor, works with student in laboratory analysis of cell tissue.

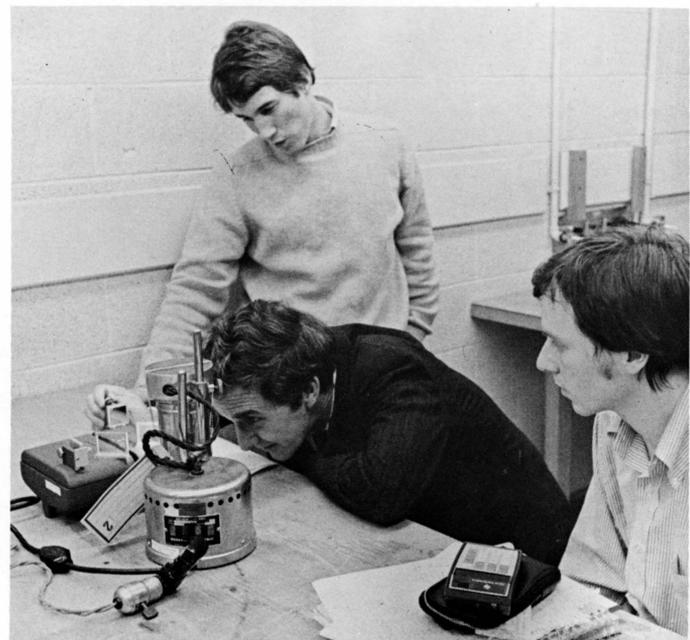

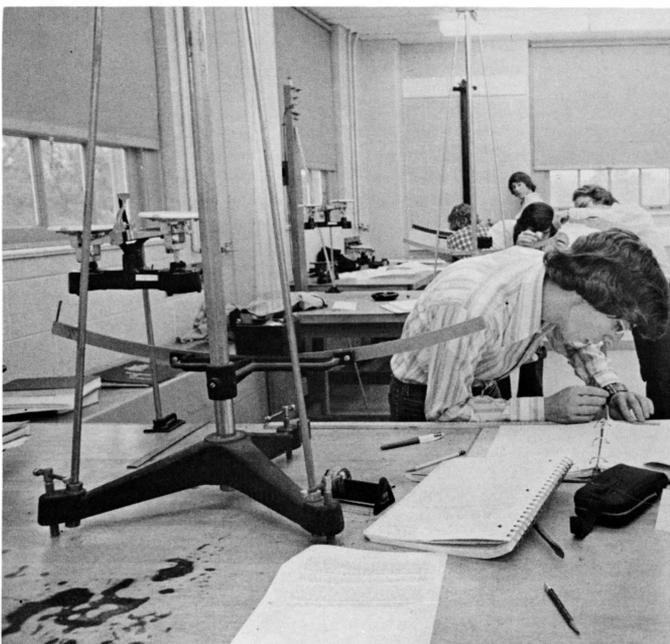

Left: Prof. Henry Ravenhorst, head of engineering department, and a student solve complex engineering problem using principles of orthographic projection.

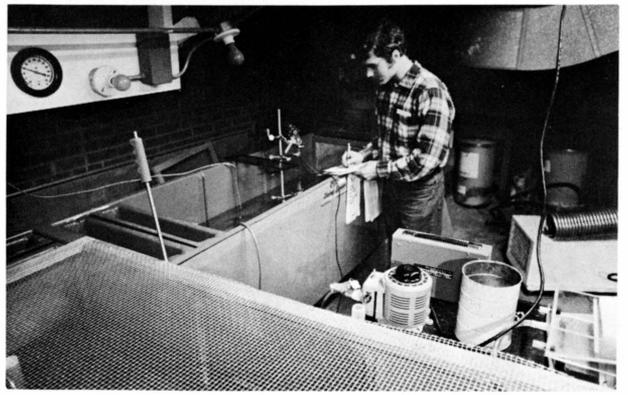

Left: Dr. Cleveland P. Hickman, biology professor, preparing specimens for analysis as part of his research into filtering characteristics of flounder kidney.

Below left: Students at work in physics-engineering lab.

Below right: Dr. James J. Donaghy (center), associate professor of physics, directs students in laboratory experiment in electromagnetism.

University of British Columbia. Not to mention two dozen or so research articles, mostly on the filtering characteristics of the fish kidney.

If he's in the lab, he's likely to be carrying out the research on which future articles of that kind will be based. The fish kidney, it seems, is remarkably advanced and in many ways is more suited to experimentation than any other kind, including the human kidney. The flounder kidney has the additional research advantage of adapting readily from fresh water to salt. Hickman is aided in that research by several biology majors under the University's Robert E. Lee Research Program. "We're finding out much that we hadn't expected," Hickman says of their research.

Come spring, he'll be taking five majors to the Galapagos Islands for a field zoology course to study the diversity of life and animal behavior in what he calls "an evolutionary showcase."

You're also likely to meet Dr. Thomas G. Nye, a specialist in ecology—the biological interrelationships between organisms and environment. Dr. Nye, who also teaches cell biology and biochemistry, is currently engaged in research—also with the aid of Robert E. Lee Research Program student assistants—into ways of measuring the rate of respiration of aquatic invertebrates.

Or Dr. L. R. Emmons, who—also with Lee Research assistants—is investigating the chromosomes of a bacterium, *Escherichia coli*, found in the stomach of man. He's focusing on the series of genes—the "Uhp operon"—in the chromosome which allows the bacterium to utilize energy, and is also "mapping" the chromosomal changes in mutations of a virus which is an enemy of *Escherichia coli*.

Or Dr. William E. Bryant, Jr., whose principal teaching fields are botany and microbiology. His current research projects (in which, like his colleagues, he is working with Robert E. Lee Research Program students) involve determining the conditions of incubation for development of a certain fungus that is useful in studying heredity and developing techniques for manipulating the fungus in culture. He's also directing a project to improve the management of W&L's greenhouse by adapting growing conditions for various plants, pest control and such—to enhance the usefulness of the greenhouse for instruction and research.

Or Dr. Gary H. Dobbs III, a W&L graduate (valedictorian of his class in 1970) who is back to teach for the Winter and Spring Terms this year after completing his Ph.D. in marine biology at the Scripps Institute of the University of California at San Diego. His research has been closely associated with Dr. Hickman's; he's also spent time in the Antarctic studying the "anti-freeze" in bony fishes there.

Throughout, the most evident characteristics are the ones of which Washington and Lee has always been proudest—the extraordinary quality of its professors, all of whom are accomplished and active scholars, but whose highest ambitions are to be teachers of undergraduates; the excellence of the students, their inquisitiveness, their eager acceptance of the challenge of a rigorous curriculum; the sophistication of the facilities at their disposal.

Washington and Lee has always viewed the natural sciences as an integral part of the educational process—bringing to students "the" wonders, the significance, and the underlying harmony of the world in which we live." Research is an integral part of every professor's teaching, giving his undergraduate students the chance to participate in his work on an individual basis.

In support of the University's traditional commitment to the sciences, a number of foundations and other benefactors have made generous gifts to Washington and Lee—notably the Alfred P. Sloan Foundation, which in 1967 gave \$250,000 to the University as part of the Foundation's College Science Program to aid undergraduate teaching institutions, and which two years ago awarded an additional \$40,000 for development of a summer research program in the sciences and mathematics; and a \$197,200 grant in 1968 from the National Science Foundation under its College Science Improvement Program.

And now Miss Parmly's magnificent gift—the most inspiring endorsement of Washington and Lee's approach to science education, and a heartening endorsement of the University's character and philosophy in general, its people and its future. Miss Parmly's gift is indeed, as the Board of Trustees declared in its resolution, "an act of generosity and devotion so extraordinary that its impact uplifts the institution both physically and spiritually."

Smith Richardson Foundation gift honors Dr. Henry Louis Smith

The Smith Richardson Foundation of Greensboro, N. C., has made a \$50,000 grant to Washington and Lee to establish an endowed teaching fund in the field of journalism. The gift honors the memory of the late Dr. Henry Louis Smith, president of the University from 1912 to 1929. Re-establishment of college-level instruction in journalism was one of Dr. Smith's chief interests while he was president of W&L.

The teaching fund, which bears Dr. Smith's name, will provide support for W&L's general educational programs in journalism. It will enable the University to expand its visiting-speaker activities in the field and help meet the costs of buying essential instructional equipment.

The grant was announced by I. M. Scott of Meadowbrook, Pa., a University Trustee and chairman of the Foundation Committee of the University's Achievement Council, the group of volunteers that is spearheading the University's effort to raise \$36 million by 1976.

University President Robert E. R. Huntley called attention to the grant at the Founders' Day-Lee's Birthday-ODK convocation on Jan. 20.

"Dr. Smith made a distinguished record as head of this University," Huntley said, "and he surely qualifies as one of our founders. One of the enduring contributions he made to Washington and Lee was his success in introducing instruction in journalism, a revival of the idea first advanced by General Lee."

President Huntley introduced members of Dr. Smith's family who were special guests at the convocation. They were two sons, Dr. Norris

Smith, a 1929 graduate of W&L, and now a physician in Greensboro, and Frank Smith, a 1932 graduate, who is vice president of the North Carolina National Bank in Greensboro; and a daughter-in-law, Mrs. Raymond D. Smith, whose late husband graduated from W&L in 1922 and was an officer of the Vick's Chemical Co. of New York. Mrs. Smith now lives in Lexington and is a hostess in Lee Chapel. Her son, Raymond, Jr., is a 1955 graduate of W&L and is now a vice president of Bankers Trust Co. of New York.

Dr. Henry Louis Smith was president of Davidson College before accepting the presidency of Washington and Lee. He remembered that General Lee while he was president of Washington College had proposed in 1869 the creation of a journalism department—the first time such training had ever been suggested at any college in America. At the time, the idea was considered radical: the editor of the *New York Post*, for instance, dismissed the idea publicly as "an absurdity." After Lee's death in 1870, the journalism program lapsed and was abandoned in 1878.

Dr. Smith was determined to resurrect the idea and eventually persuaded the Southern Newspaper Publishers Association to assume responsibility for financing the department. The Lee Memorial Journalism Foundation was established for this purpose, and by 1925 sufficient endowment had been raised—substantially through a gift of \$10,500 from Mrs. Lunsford Richardson, sister of Dr. Smith—to enable the University to re-establish its journalism depart-

Dr. Henry Louis Smith

ment. The Lee Memorial Journalism Foundation continues to support a broad journalism-education program. The Smith endowment fund will provide added support for the department's six-year-old radio operation, WLUR-FM, which has increased its power output from 10 to 175 watts and added stereo capability this year. The department also has complete closed-circuit television production facilities and also operates a laboratory press with hot and cold typesetting facilities and letterpress and offset printing equipment.

Abe D. Jones, Jr., a 1951 journalism graduate of W&L and now editor of the Greensboro *Record*, noted in a recent column how the Smith Richardson Foundation gift revives and strengthens "an old network of relationships" between Washington and Lee and Greensboro. He recalled that Dr. Henry Louis Smith was often a visiting teacher and preacher at Greensboro's First Presbyterian Church—the church Dr. Smith's father, a native of the Lexington area, served as pastor for 38 years and his brother for another nine years. He recalled, too, that Dr. Smith was responsible for Dr. Charles F. Myers' becoming pastor of the Greensboro church. Dr. Smith recommended Myers after hearing him preach at the University as a young man in 1916. "Dr. Charlie" served the Greensboro church until his retirement from the pulpit in 1945.

Jones summed up: "The Smith grant is in the tradition of both the old era and the new. . . . And the grant will preserve in tangible form that longstanding link between Greensboro and Lexington."

Above: Dr. Norris Smith, '29, Frank Smith, '32, and Mrs. Raymond D. Smith are recognized at Founders' Day Convocation.

ODK taps five professional men; scholarship honors its founders

Five outstanding professional men—four of them alumni of Washington and Lee and one a chief administrative officer of the University—were “tapped” into honorary membership in Omicron Delta Kappa, the national leadership society founded at the University 61 years ago.

At the same “tap day” ceremonies on Jan. 20, ODK inducted 15 undergraduates and five law students in recognition of their leadership on campus. The fraternity recognizes outstanding achievement in scholarship, public service, the creative arts, athletics, and publications.

The four alumni recognized for their professional achievements were Barton W. Morris, Jr., publisher of the *Roanoke Times* and *World-News*; Marion G. Heatwole, general counsel for U. S. Steel Corp.; Joseph C. Broadus, senior vice president of The Petroleum Corp. of Delaware and former vice president of Chase Manhattan Bank; and Emmett W. Poindexter, a prominent New York City lawyer and a leader in W&L alumni activities in New York for 50 years.

The University administrator honored for his leadership abilities was James W. Whitehead, University treasurer and secretary of the Board of Trustees.

Morris is a 1943 graduate of W&L. He has been associated with the Roanoke newspapers since 1946, following his service with the Army Air Corps, and was executive editor of the newspapers before being named publisher.

Heatwole earned his bachelor's degree at Washington and Lee in 1941 and his law degree in 1946. A veteran of the Navy during World War II,

Joseph C. Broadus

Emmett W. Poindexter

he joined the legal staff at U.S. Steel in 1946. He is a member of the University's Achievement Council, the volunteer group responsible for realizing the University's development goals for the 1970s.

Broadus received his bachelor's degree from W&L in 1930. He began his banking career in Nashville, Tenn., and served in the Navy during World War II, attaining the rank of lieutenant commander. He was instrumental in bringing Washington and Lee again to the attention of Miss Ruth Parmly of New York City, whose \$1.5-million gift to the University's endowment was announced at the “tapping” ceremonies. Broadus is also a member of the Achievement Council.

Poindexter received his bachelor's degree from W&L in 1920 and his law

degree three years later. He is a partner in the New York City law firm of Poindexter & Borland, and because of his enthusiastic leadership among alumni in the area he has been nicknamed by common consent “Mr. Washington and Lee” in New York.

Whitehead has been a member of the Washington and Lee administration since 1958. He is a graduate of the University of Tampa and holds an honorary doctorate from that institution. Before coming to W&L, he was public relations director at Tampa, national finance director of the National Conference of Christians and Jews, and executive director of the Empire State Foundation of Independent Liberal Arts Colleges. At W&L, he is curator of the University's priceless Reeves Collection of Chinese Export Porcelain and co-

Barton W. Morris, Jr.

James W. Whitehead

Marion G. Heatwole

ordinator of the University's many-faceted Bicentennial program.

The third-year law students "tapped" by ODK were Charles J.

Brown of Lexington; Ray V. Hartwell, III, of Jacksonville, Ala.; W. Henry Jernigan, Jr., of Cincinnati; John C. Sheldon of Upper Montclair,

N. J.; and Jeffrey L. Willis of Flagstaff, Ariz.

Undergraduate seniors inducted were Matthew J. Calvert of Lynchburg, Va.; Robert H. Crawford of Dallas; David J. DeChristopher of Maumee, Ohio; Guy H. Kerr of Dallas; Lawrence F. Lyles of Spartanburg, S. C.; Robert G. Morecock of Virginia Beach; Thomas O. Rainey, III, of Dinwiddie, Va.; William H. Sturges of Charlotte, N. C.; J. Bowman Williams of Dallas, and Robert Q. Wyckoff, Jr., of West Palm Beach, Fla.

Undergraduate juniors "tapped" were John G. Berry of Madison, Va.; J. Michael Luttig of Tyler, Texas; Leland G. McCullough, III, of Shreveport, La.; Robert G. Pugh, Jr., of Shreveport; and Kenneth P. Ruscio of Lincroft, N. J.

Scholarship Honors ODK Founders

The ODK "tap day" ceremonies also brought the announcement that a new scholarship fund honoring the 15 founders of ODK has reached the full level of funding.

The ODK Scholarship will be awarded to the student "whose campus leadership exemplifies the ideals" of the society—leadership and service based on concern for one's fellow man, both in college and in society.

ODK, founded at W&L in 1914, now has chapters on more than 100 college campuses. Only two of the founders are still living. They are Dr. James E. Bear, Jr., of Harrisonburg,

Va., a retired professor at Union Theological Seminary in Richmond, and Rupert N. Latture, who taught politics at W&L from 1920 to 1962 and continues to work full time as an assistant in the President's office.

The other founders were William Moseley Brown, Carl Shaffer Danielson, Edward Parks Davis, Edward A. Donahue, De La Warr Benjamin Easter, James Carl Fisher, Philip Pendleton Gibson, Thomas McPheeters Glasgow, David Carlisle Humphreys, John Eppes Martin, William Caufield Raftery, John Purver Richardson, Jr., and Henry Louis Smith.

W&L men

are offered

associate

membership

in the

Princeton Club

Washington and Lee alumni are being offered the opportunity to become associate members of the Princeton Club of New York. Associate members enjoy all of the privileges the club offers and have full use of the club's extensive and conveniently located facilities at 15 West 43rd Street.

And the price is right!

If as many as 25 or more Washington and Lee alumni, faculty members, and administrative staff members sign up within a period of 90 days, the regular \$250 entrance fee will be eliminated for them. The only cost to the initial group will be the annual dues, payable annually or quarterly. Thereafter, W&L applicants will be charged an entrance fee amounting to 20 per cent of the annual dues applicable to their category of associate membership.

The Princeton Club provides all of the services of a superior hotel, plus squash and athletic facilities, locker rooms, private dining rooms, a well stocked library, lounge areas, special club activities, and other conveniences, including nearby parking at reduced rates. The club's bedroom charges and incidental fees are much less expensive for club members than at comparable commercial hotels. Bona fide guests of W&L associate

members, which may include women, are also accorded these privileges.

Qualifications and categories of associate membership available to W&L people are as follows:

RESIDENT—Resides in or has a principal place of business within the limits of New York City (five boroughs). *Junior*: A resident who is 35 years of age or under—Annual cost: \$270.00; Quarterly cost: \$67.50. *Senior*: A resident over 35 years of age—Annual cost: \$378.00; Quarterly cost: \$94.50.

SUBURBAN—Lives within a 50-mile radius (as the crow flies), but not within the limits of New York City: Annual cost: \$270.00; Quarterly cost: \$67.50.

NON-RESIDENT—Lives beyond a 50-mile radius of New York City (as the crow flies): Annual cost: \$194.40; Quarterly cost: \$48.60.

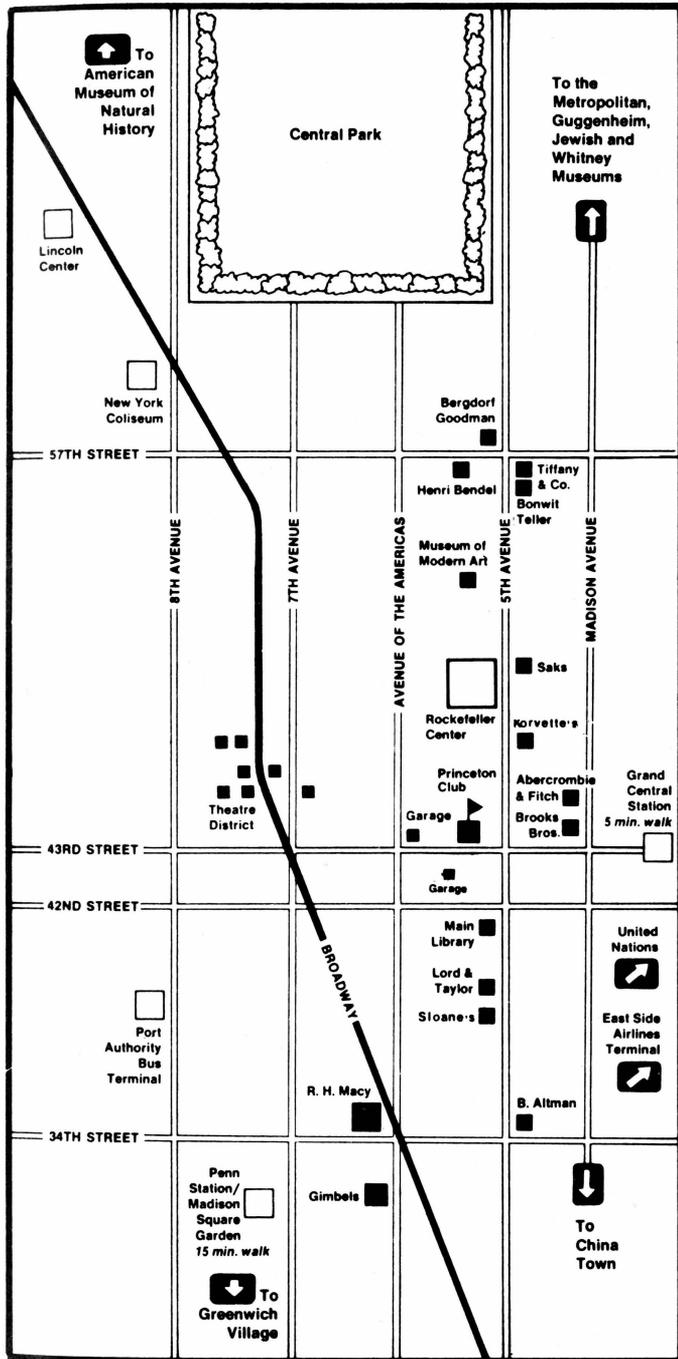

EDUCATIONAL—A full time professor, instructor, or a member of the administrative staff: Annual cost: \$135.00; Quarterly cost: \$33.75.

The above rates include the 8 per cent New York tax.

Arrangements for W&L associate memberships in the Princeton Club were made by the W&L Alumni Chapter in New York in cooperation with the Washington and Lee Alumni Board of Directors. The New York Chapter has unanimously endorsed the program and intends to make the Princeton Club its principal place of social activity and some other chapter functions. James O. Mathews, '70, and Paul W. Perkins, '74, of the New York Chapter handled the negotiations in New York; they were assisted by Richard D. Haynes, '58, of Dallas, vice president of the Alumni Board.

Over the years it became evident that W&L alumni could not, because of the heavy expense involved, establish or construct a club of their own in New York. But the New York Chapter and the Alumni Board continued to look for practical ways of making club facilities available to W&L people living, working, or visiting New York. After investigating affiliation with various existing clubs, the New York Chapter and the Alumni Board decided that associate membership in the Princeton Club offered the best arrangement.

The Princeton Club was completed in 1963 and is one of the most modern and well equipped club facilities in the country. Its location at 15 West 43rd Street,

THE CLUB'S CONVENIENT LOCATION AND ACCESSIBILITY

just west of Fifth Avenue, is central to midtown Manhattan's business and cultural activities. The new office buildings along the Avenue of the Americas are just around the corner, and the club is convenient to Grand Central and Penn Stations, the shopping and theater districts, Madison Square Garden, and the Lincoln Center for the Performing Arts. Two parking garages on 43rd Street just west of the club offer members convenience and reduced rates.

A major part of the club's facilities is devoted to food and beverage services. There are three restaurant dining rooms, the Tiger bar, an oyster bar, a cocktail lounge, and nine private dining rooms. All 48 of the club's bedrooms are air-conditioned and have private baths and color television. The club has three championship singles squash courts, exercise gym, and sauna, with lockers available on a monthly or annual basis. The library on the fifth floor contains over 8,000 books and periodicals. There are several lounge areas for men and women.

All interested W&L people who qualify for associate membership in the Princeton Club should make application immediately. Remember that if 25 or more sign up within the 90-day period the entrance fee will be waived for this initial group. Use the order form below to request application blank and further information. Clip and mail to: CLUB PROGRAM, Washington and Lee Alumni, Inc., Lexington, Virginia 24450.

Homer Holt, Trustee Emeritus, 1898-1975

Homer Adams (Rocky) Holt, a Trustee Emeritus of Washington and Lee and 20th Governor of West Virginia, died Jan. 16 in a Charleston, W.Va., hospital. He would have been 77 on March 1.

Gov. Holt was closely associated with Washington and Lee throughout his adult life. Born in Lewisburg, W. Va., in 1898, he received his undergraduate degree from W&L in 1918 and his law degree in 1922. He taught mathematics at the University from 1920 to 1923 and was an instructor in the School of Law from 1923 to 1925.

He was named to the University Board of Trustees in 1940 and served ably until retiring from the Board and being named Trustee Emeritus in 1969.

After serving as West Virginia's Attorney General for four years, Holt was Governor from 1937 to 1941. As Governor, he was confronted by the trying Depression years and the onset of World War II. He succeeded in

Homer Holt in 1966 photo.

bringing about better financing of public schools, teacher tenure and retirement, and improved fiscal controls in state government. Except for five years as general counsel of the Union Carbide and Carbon Corp. in New York, Holt practiced law in West Vir-

ginia before and after his eight years in public office.

He is survived by his wife, two daughters, a son, and two sisters.

The Washington and Lee Board of Trustees at its January meeting adopted the following resolution in his memory:

"To many Homer Holt was known primarily as a giant in his profession and as one of the greatest statesmen in the history of his native state. To his Alma Mater he was more. As a student, as a teacher, as a member of Washington and Lee's Board of Trustees for a quarter of a century, he gave devotion, unselfish service, and generous assistance. On countless occasions his tough-minded wisdom brought guidance to his University, and his devotion to high ideals of education and principles of integrity gave it purpose.

"To his fellow Board members he was a beloved friend. We treasure his memory—and we shall miss him."

Chapter news

JACKSONVILLE. James D. Farrar, director of admissions, and William D. McHenry, athletic director and head football coach, were guests of the chapter at its fall meeting on Nov. 18, 1974, at the Colonial Point Apartments. Both Farrar and McHenry were in Jacksonville on a recruiting trip. Following a social hour, Dean Farrar explained the current status of admissions at the University and emphasized the role that alumni can play in aiding the University's recruiting program. Coach McHenry reviewed the Generals' 1974 football season, discussed the prospects for next year, and narrated a film of W&L's exciting victory over Sewanee.

In the swing at Lynchburg Christmas party are John Alford, '57, and Mrs. Henry M. Sackett, III.

NASHVILLE. Alumni of the Nashville area gathered on Nov. 30, 1974, at the Tennessee Fine Arts Center (Cheekwood) for the opening of Washington and Lee's traveling exhibit of the Reeves Collection of Chinese Export Porcelain. Arrangements for the cocktails and hors d'oeuvres were made by Frank A. Berry, Jr., '46, a Nashville attorney. Guests from the University were President and Mrs. Huntley, Treasurer and Mrs. James W. Whitehead, and Alumni Secretary Bill Washburn. There was discussion during the gatherings of plans to organize an official alumni chapter in the Nashville area. Whitehead participated in the opening of the exhibit at the Fine Arts Center on Dec. 1-2.

Bright spirits at Lynchburg party were Mrs. Richard M. Livingston, R. D. Bradley (VMI), Henry M. Sackett, III, '64, and E. Stark Sydnor, '66.

LYNCHBURG. The chapter held its annual Christmas dance at the Elk's Club on Friday, Dec. 6, 1974, and the event was described by those who were there as a "smashing success." A large group of alumni and their guests attended and ushered in the Christmas season in fine style to the music of the Velvetones. Invitations and arrangements were made by Edward R. Feinman, '49, president of the chapter.

Mrs. John G. Powell and Edward R. Feinman, '49, at Lynchburg party.

Roger Milam, '67, and President Huntley at Nashville gathering.

SPECIAL NOTE: Chapter activities during January and February will be reported in the March issue of the magazine.

Class notes

THE WASHINGTON AND LEE CHAIR

With Crest in Five Colors

The chair is made of birch and rock maple, hand-rubbed in black with gold trim and arms finished in cherry. It makes a welcome gift for Christmas, birthdays, anniversaries, or weddings. All profit from sales of the chair goes to the scholarship fund in memory of John Graham, '14.

1927

ROBERT E. STEVENSON has retired after 47 years with the Gulf, Mobile and Ohio Railroad Co. He was a senior vice president and resided in Mobile, Ala. He was a director of the GM&O Railroad, the GM&O Land Co., the Terminal Railroad Association of St. Louis and the Illinois Terminal Railroad.

JOE W. PITTS, Sr., has retired as chairman of the board of Brown-Roberts Hardware, Inc., after 47 years of service. He lives in Alexandria, La., enjoys good health, an active life, and plenty of golf.

1929

I. WILLIAM HILL, who retired from the Washington D. C. *Star* in 1973, has been named Washington correspondent for *Editor & Publisher* magazine. Hill began his newspaper career with the Mobile, Ala. *Press*. He has served as president of the Associated Press Managing Editors Association. While a member of the board of directors of ASNE, Hill made a three-week visit to the People's Republic of China in October, 1972.

1930

CHARLES W. COCKE is retired and lives in Thomasville, Ga., where he remains active in church work, yard work, and playing golf. He recently accepted the presidency of a chapter of the National Association of Retired Federal Employees.

1932

DAVID GEORGE PRICE is now retired from the Navy Bureau of Personnel. He serves on a voluntary basis as a consultant to a nursery school in Bethesda, Md.

1934

FOSTER PALMER, associate university librarian at Harvard, is retiring after 36 years of service, primarily in reference work and computer applications. He continues as editor for the Cambridge Historical Society.

1935

NORMAN S. FITZHUGH has retired from active CPA practice and is now doing semi-practice accounting for selected clients.

CHARLES F. PORZIG, a salesman for both R. C. Motor Lines, Inc., of Jacksonville, Fla., and

Eastern Express, Inc., of Terre Haute, Ind., has retired and now lives in Upper Montclair, N. J.

FRED D. STRONG, after having served as controller for two prep schools in New York City and in New England, has retired and is currently living in Burton, S. C.

JOHN A. WEBBER is a member of the board of directors and continues to be active in sales with Jamison Bedding, Inc., of Nashville, Tenn. He has been with the firm for 35 years.

1936

GEORGE W. HARRISON was named Legionnaire of the Year, 1974, by Post 60 of the American Legion. He lives in Henderson, N.C. and is on the board of directors of Henderson-Vance Chamber of Commerce.

1937

WILLIAM C. WILBUR, JR., is professor of history at Eckerd College in St. Petersburg, Fla. He has served 13 years as chairman of the Division of History and Social Sciences.

1938

PAUL M. MILLER reported in December to Santo Domingo, where he will be consul in charge of the visa section at the American Embassy.

1939

DR. ALEXANDER BLAIN, III, chief surgeon of Alexander Blain Hospital and also Blain Clinic in Detroit, has been appointed by the mayor to the Detroit Zoological Park Commission. Until 1960, the Blains maintained a game preserve on Blain Island in Oakland County's Waterford Township. There they kept and bred a variety of animals including bison and bears. Dr. Blain is on the surgical faculty at the Wayne State Medical School. Recently Dr. Blain presented a portrait of his father, Dr. Alexander Blain Sr., to the Wayne County Medical Society. The senior Dr. Blain was president of the Society in 1933-34.

1942

WALTER C. ABERG, JR., lives in Cave Creek, Ariz., where he not only operates gasoline stations under the name of Carefree Chevron Services but is also in real estate as a broker associated with Desert Forest Realty in Lakefree, Ariz. Aberg also keeps his hand in in-

insurance as a representative of Tom Jackson Insurance Agency in Phoenix.

After 15 years, WALTER L. MONROE has retired as town commissioner, president of commissioners, secretary, and utilities commissioner of Millsboro, Del. He currently serves as vice chairman of the board of trustees of Grace Methodist Church.

GEORGE ARTHUR WOOLFENDEN is currently publisher of the *Burroughs Clearing House Magazine*, one of the largest bank and financial trade books in the country. Woolfenden travels a great deal for Burroughs Corp. and, for several years, has been in public relations work for the corporation, particularly in their international division.

W. TOWNES LEA continues in the tobacco auction warehouse business in Danville, Va. He also holds joint ownership in Lea Realty Co. and is a partner in Lea & Pierce Real Estate. Lea also is vice president of Harry Lea Volkswagon, Inc., and president of United Enterprisers & Developers. He is currently a member of the board of trustees of Averett College and the Danville Memorial Hospital.

C. THOMAS GARTEN is president of Broadcasting Services, Inc. (WTAP-TV) in Parkersburg, W. Va. He is chairman of the Parkersburg Salvation Army Advisory Board, a member of the board of Red Cross, a member of the Fine Arts Council, and a member of the steering committee of the Better Government Association.

ROBERT T. VAUGHAN, an attorney in South Boston, Va., is active in the Virginia Bar Association. He is currently chairman of the Efficiency and Economic Research Committee, chairman of the Legal Education and Admission to the Bar Committee, and president of the 10th Judicial Circuit Bar Association.

BERTRAND P. KADIS and his associates, J. Lynwood King, '43, and Carl King, '42, (Ben Kramer), are completing a residential development project in Yonkers, N. Y. known as Pocono Country Place. The successful community includes 50 miles of roads and water and sewer lines. Kadis reports that approximately 60 per cent of the project has been sold.

C. LANE SARTOR, geologist with Wheless Drilling Co. of Shreveport, La., has been

elected vice president for 1974-75 by the Gulf Coast Association of Geological Societies.

CHARLES BUFORD CONNER has been with the U.S. Government for 30 years and is program manager, DCS/Development, Headquarters, Air Force Systems Command at Andrews AFB in Washington, D. C. He is part of a team which has developed new and improved aeronautical, ballistic, space, and electronic systems for the U.S. Air Force.

1943

Three alumni in recent months have been elected to positions of leadership in realtor organizations. JAMES E. McCAUSLAND, '43, a partner in Snead-Payne & McCausland, Inc., in Lynchburg has been elected first vice president of the Virginia Association of Realtors and is thus in line to become president next year. I. THOMAS BAKER, '55, an associate in Meade Associates, Inc., in Lexington has become president of the Lexington-Rockbridge Board of Realtors. H. MERRILL PLAISTED, III, '57, a vice president of Morton G. Thalhimer, Inc., in Richmond has been named president of the Richmond Board of Realtors. Baker and Plaisted were both members of SAE fraternity when they were at W&L.

1944

JAMES CALEB STANFIELD is general counsel for the Edgar County Bank and Trust Co. of Paris, Ill. He also is engaged in the breeding of registered Texas Longhorn cattle and is a member of the board of directors of the Texas Longhorn Breeders Association of America.

1945

E. DEAN FINNEY is president and general manager of WTWN Radio in St. Johnsbury, Vt., and WIKE in Newport, Vt. He is serving his third year on the board of trustees of Vermont State College and has served a six-year term on the State Board of Education.

DON M. CASTO, JR., a developer and owner of shopping center malls, has recently completed the Scottsdale Mall in South Bend, Ind. He lives in Columbus, Ohio.

1946

ROBERT J. SMITH, a Richmond attorney, has been appointed substitute judge in Henrico

County for the Juvenile and Domestic Relations Court.

1947

T. W. SOMMER is assistant regional counsel with the Internal Revenue Service. He and his wife have four daughters, and the family lives in Salt Lake City.

1948

JAMES CALEB STANFIELD (See 1944)

1949

TAIT TRUSSELL is administrative vice president of the American Forest Institute, the communications service of the forest products industry.

MATT W. PAXTON, JR., is serving as president of the Historic Lexington Foundation, which is restoring buildings and developing downtown Lexington, Va.

1950

J. ARTHUR WOOD, JR., whose cartoons brighten the United States Independent Telephone Association's *Memberletters*, has been elected president of the Association of American Editorial Cartoonists, an organization representing more than 200 cartoonists in this country, Canada, and other Western Hemisphere nations. Wood is editor of the *USITA Memberletter* and director of member information for USITA.

EDWARD P. THOMAS was reelected to the Maryland State Senate from the district covering the eastern third of Washington County. Thomas is a businessman in Frederick.

FRANK LOVE, JR., is senior partner of the Atlanta law firm of Powell, Goldstein, Frazer and Murphy. He specializes in civil trial practice and is currently serving as president of the Georgia Defense Lawyers Association. Love is also in his second term on the board of governors of the State Bar of Georgia. Since 1972, he has been a fellow of the American College of Trial Lawyers. He and his wife have a daughter and a son.

1951

JUDGE L. L. MASON, JR., of Powhatan, Va., became judge of the 11th District Juvenile and Domestic Relations Court in July, 1974. Before his appointment, he was in the gen-

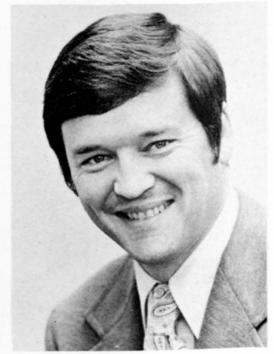

Class Notes

D. R. Taylor, '51

J. L. Lanier, Jr., '54

J. H. Crocker, Jr., '58

eral practice of law for eight years in Powhatan.

ROBERT T. PITTMAN, editorial page editor of the St. Petersburg, Fla. *Times*, has been elected secretary of the National Conference of Editorial Writers.

DONALD R. TAYLOR has become administrator of the Tryon Palace Restoration Complex in New Bern, N. C. He has been in charge of the educational and interpretative programs at Tryon Palace since 1962 and has coordinated Tryon Palace symposia on 18th-century decorative arts. He has written a number of historical articles on New Bern and Hampton and has been active in historical and American Revolution Bicentennial affairs. Tryon Palace, a thriving tourist attraction, was opened in 1959 as a complete restoration of the first state capitol and the home of the first governor of North Carolina.

FRANK LOVE, JR. (See 1950)

1952

HORACE W. DIETRICH, JR., has become property manager for the Denver Technological Center, which is a large office park development. He and his wife, Nancy, have three children.

CAPT. ROBERT F. CONNALLY, U.S.N., after a tour of duty with the Office of the Joint Chiefs of Staff in Washington, D.C., is now the commanding officer of the Navy Recruiting District, Houston.

PHILIP ROBBINS, formerly with the *Washington-Star*, is now chairman of the journalism department at George Washington University. He has been associate professor in the department since 1970.

1953

SIMON H. GALPERIN, JR., has been elected to a second term in the West Virginia State Senate.

1954

JOSEPH L. LANIER, JR., executive vice-president for the past five years of West Point Pepperell textile corporation, has recently been elected president. Lanier has served in various capacities with the company since 1957. Immediately prior to becoming executive vice president in December, 1969, he was president of the Industrial Fabrics Division

with headquarters in New York City. He will now have his headquarters at the Corporate Offices in West Point, Ga. Lanier has been a member of the West Point Pepperell board of directors since 1968.

CARL D. SWANSON, associate professor of psychology and director of the Counselor Education Program at Madison College, has been chosen as an Outstanding Educator of America for 1974. The selection is made on the basis of his professional and civic achievements.

WALTER SMITH of Atlanta was recently appointed to the Commission on Ministry in the Episcopal Diocese of Atlanta. He is a visiting lecturer this semester at the Atlanta College of Art in addition to his private practice in pastoral therapy and counselling. This summer he will be a lecturer at the Southeastern School of Alcohol Studies at the University of Georgia's Center of Continuing Education.

His present assignment is midwest manager of sales engineering and market development for Fellows' Plastics Division in Chicago. Other assignments have taken him to Detroit, Cleveland, and Nagoya, Japan.

1962

DR. ROBERT P. CARROLL, JR., is a charter fellow in the American Academy of Family Practice. He and his wife have three children and live in Nacogdoches, Texas, where Dr. Carroll is also in student health service at Stephen F. Austin State University.

DR. JOSEPH L. GOLDSTEIN and Dr. Michael Brown are two researchers who have identified for the first time a specific inherited de-

fect in the body's cells that causes many Americans to have cholesterol levels two and three times higher than they should. Working with human-skin cells growing in their laboratory at the University of Texas' Southwestern Medical School, the researchers isolated "receptors" to which cholesterol molecules in the blood attach themselves. These "receptors" play a vital part in the complex mechanism that regulates the amount of cholesterol the body produces. Persons suffering a form of inherited high cholesterol have no more than half the normal "receptors." As a result, their cholesterol-regulating systems malfunction. This discovery has major implications both for heart-disease research and the study of other serious genetic disorders. The work is an outgrowth of a landmark study led by Goldstein while he was at the University of Washington School of Medicine. An article about the work and study of these two doctors appeared in the October 26 issue of *The National Observer*.

STANLEY P. ATWOOD has become a partner of the Westport, Conn., law firm of Sherwood, Garlick and Cowell. He has been associated with the firm since 1972. Atwood has served as assistant town attorney and town attorney since January, 1972. He is also a member of the town's Conservation Commission and is chairman of the Board of Tax Review. Among his many civic activities are membership on the Committee of Ship 136 of the Sea Explorers, Boy Scouts of America, and treasurer of the Westport-Weston Arts Council.

JAMES D. FARRAR, JR. is assistant admis-

sions director at Episcopal High School in Alexandria, Va. He also teaches United States history and coaches in football, wrestling, and lacrosse.

In Memoriam

1906

FRANCIS A. HOLLINGSWORTH, a retired architect in St. Augustine, Fla., who designed many of the city's buildings, died Sept. 27, 1974. A native of Harrisonburg, Va., he went to St. Augustine in the early 1920s. A noted and honored architect, Hollingsworth drew plans for the restoration of the historic State Arsenal Building. He also designed the Arsenal Annex, the Mark W. Lance Armory, the Ketterlinus High School, the First National Bank Building, which is now the Atlantic Bank of St. Augustine, the St. Augustine Record Building, the pier and recreational center at St. Augustine Beach, and many other buildings and facilities in the city. In 1955, he received a citation from the Society of Architectural Design. The Military Department of Florida awarded him the Distinguished Service Medal for outstanding contributions to the Florida National Guard.

1912

FRED W. PERKINS, a retired writer on labor matters for Scripps-Howard newspapers, died Dec. 11, 1974, in Silver Spring, Md., after a long illness. When he retired in 1959, Perkins was considered the dean of labor reporters in the nation's capital. He joined the old Washington *Daily News* in 1931 and began specializing on labor matters during World War II. Perkins became a friend of John L. Lewis, then head of the United Mine Workers. He started his newspaper career in Parkersburg, W. Va., and during the 1920s was in charge of the U.S. Department of Agriculture's motion picture work. His assignments took him to Latin America, Australia, New Zealand, and the South Seas.

1916

CAPT. WILLIAM CLARENCE WADE (USN Ret.) of Bethesda, Md., died March 25, 1974. Capt. Wade served in World War I on the

USS Dolphin. He was selected to specialize in naval architecture and went to M.I.T. for two years of post graduate work. He served in various capacities during World War II and was, at one time, with the Army and Navy Munitions Board. He was a member of the Chevy Chase Club and of the Army and Navy Club in Washington.

1921

HOWARD K. GIBBONS, retired Madison College business manager, died Jan. 1, 1975 in Harrisonburg, Va. Gibbons went to Harrisonburg as treasurer of the State Teachers College, now Madison College, and was associated with the college until retiring as the business manager in 1966. He was active in the United Way and was president of the local Boy Scouts council and received the Silver Beaver Medal for leadership.

1922

WILLIAM H. BARRETT, who for many years was a public school administrator in Northern Virginia, died Jan. 6, 1975, in Arlington. Barrett had been in the educational field since 1922, retiring several years ago. He was a former assistant principal of Jefferson High School and was with the Fairfax County Public School System when he retired.

1923

JAMES RICHARD THOMAS, a native of Helena, Ark., died in Fort Worth, Texas Nov. 18, 1974. Thomas had lived in Fort Worth for 45 years. He was a mortgage banker and was a retired manager of the Southwest Region of Lincoln National Insurance Co.

1924

JACK LANIER NEAL, a prominent citizen of Danville, Va., died Sept. 8, 1974.

1926

WILLIAM COOK NORVELL, JR., a well-known attorney in Lakeland, Fla., died Feb. 22, 1974. In addition to his law practice, Norvell owned fruit groves and was formerly president of Norglo Fruit and Vegetable Co.

G. FRED SWITZER, a prominent business man and former leader in the Virginia Democratic party of Harrisonburg, Va., died Dec. 20, 1974. He was president of the Harrisonburg Telephone Co. for 33 years and

was an official of the First National Bank of Harrisonburg for 31 years. He was also a former postmaster and had been a member of the Democratic State Central Committee. Switzer was a director and officer of the First National Bank from 1941 until the bank was acquired by Virginia National Bank in 1972. He was a member of Virginia National's state board. Switzer was a longtime leader in state political circles and was praised by Governor Godwin at a dinner in Richmond on Nov. 20, 1974.

1927

CHARLES WELLES LITTLE, a prominent attorney of Hagerstown, Md., died Oct. 25, 1974. He was admitted to the bar in 1928 and had practiced in Hagerstown since 1930. He was a former equity examiner for the Washington County Circuit Court and was also a member of the Washington County Board of Liquor Licensers.

1928

DR. LUCIOUS LAMAR DAVIDGE, a former president of the Shreveport, La. Medical Society and the former chief of staff at the Schumpert Medical Center, died Nov. 20, 1974, following a brief illness. He was a member of the American Medical Society and a fellow of the American College of Cardiology. His specialty was internal medicine. He joined the staff of Schumpert in 1937. He served in the Army Medical Corp from 1941 to 1946, including a two year tour at the 262nd General Hospital in Panama. Following the war, Dr. Davidge returned to Schumpert and in 1961 was named president of the medical staff.

1929

RICHARD POWELL CARTER, well-known journalist, educator, and businessman, died Nov. 28, 1974 in Decatur, Ga. Carter began a career in journalism in 1929 and held several positions with the Richmond *Times-Dispatch*, the Greensboro *Daily News*, the Associated Press in Richmond, and the Roanoke *World-News*, where he was a former editor. He received the Distinguished Service Award for Editorial Writing in 1942 and 1943. In Atlanta, he had been associated with Armour Agricultural Chemical Co.

JOHN HAMMAN, JR., president of Hamman Oil and Refining Co., an oil exploration firm, died Feb. 11, 1974. Hamman was a

member of the American Association of Petroleum Geologists and was a past president of the Texas Museum of Fine Arts in Houston. He was also a former director of the Texas National Bank of Houston.

JOSEPH EMMETT WOLFE, a manufacturer's sales representative, died Oct. 22, 1974 in Miami, Fla.

1930

RICHARD E. GOOCH, a native of Lynchburg and a member of the board of overseers of Lynchburg College until May, 1974, died Dec. 30, 1974, at his home in Lexington. Gooch was a member of the staff of radio station WWOD for a number of years and was associated also with WLVA television. Following his association with WLVA, Gooch was a land developer in Lynchburg before he retired. After moving to Lexington a few years ago he was associated with WLUR-FM, the radio station operated by Washington and Lee's journalism department. He was a generous benefactor of Washington and Lee.

LARA FINLEY HUTT, JR., of Pine Bluff, Ark., president of the Hutt Building Materials Co., died Nov. 17, 1974. Before going into the building materials business in 1943, Hutt worked for the Simmons First National Bank in Pine Bluff for 20 years. He was a charter member of the Jefferson County Industrial Foundation, a member of the Pine Bluff Chamber of Commerce, and a member of the board of the Merrill Foundation.

1936

JOHN H. RENKEN, JR., who was in the real estate and insurance business in Nanuet, N.Y., died Oct. 25, 1974. He was a former commander of the American Legion Post and a former member of the Nanuet school board.

JOHN ANDREW CHANDLER of Gastonia, N.C., died Nov. 3, 1974.

1938

STAUNTON B. SAMPLE, prominent Shreveport, La., business and civic leader, died Nov. 10, 1974, following an accident on his farm in DeSota Parish near Shreveport. Sample, who was a director of the Commercial National Bank of Shreveport, was a member of a family prominent in business and finan-

cial circles in Shreveport for several generations. He was a director of the Delta Cotton Oil Mill of Jackson, Miss., and formerly a partner in Garrison and Sample Insurance Agents. He was active in school and church affairs and was a former president of the board of Southfield School and a former vestryman at St. Mark's Episcopal Church. He had served as president of Downtown Shreveport, Inc., and was a former president of the Shreveport Club. During World War II, Sample served in the South Pacific with the 25th Infantry Division and left service with the rank of major.

1940

ROBERT BAUR SHREVE, a leading insurance man in Springfield, Ohio, died Dec. 22, 1974. Shreve was employed by the Credit Life Insurance Co. of Springfield.

GEORGE FORMAN TAYLOR, JR., a native of Louisville, Ky., and a sales representative for A. C. Delco Division of General Motors, died in Mobile, Ala., Nov. 3, 1974. He was an Army veteran of World War II, attaining the rank of major.

1947

DR. JOHN WILLIAM FUNKHOUSER, a geology professor at the John Tyler Community College in Chester, Va., died Dec. 3, 1974. Dr. Funkhouser taught geology also at Virginia Commonwealth University in Richmond and was well known for being one of the first men to call attention to the geologic fault beneath the Virginia Electric & Power Co's Nuclear Power Plant site in Louisa County.

1964

WILLIAM H. CHAPLIN, a member of the English department at San Francisco State University in California, died Dec. 11, 1974. Chaplin lived in Lexington from 1950 to 1954. He received his master's degree in English at the University of Virginia in 1966 and doctorate in English at the University of Massachusetts in 1973.

1968

MARK HUNTER HORNE died Dec. 2, 1974, in Denver, Colo., as a result of a skiing accident. A native of Newport News, Va., Horne had moved to Denver in January, 1974, where he worked in the environmental branch of the Interior Department.
